Tom Moss, Former Carbon Man, Dies In Calgary Hospital

Thomas Moss, 63, died in a Calgary hospital Tuesday, October 5, after a brief illness.

Mr. Moss was born in Lancashire, England, coming to Canada and to the Carbon district in 1910, where he homesteaded. In 1928 he moved to Swallow, Alta., where he has resided since. He was a grain buyer for the Alberta Pacific Grain Co. and a partner in the Carbon Lodge A.F. and A.M.

Surviving are his widow, Ann Jane (Swallow), one son, William L. of Foremost; one daughter, Mrs. Florence L. Haggard of Waterton Park; one brother, Hugh of Lethbridge.

Rev. J. McKnight officiated at the funeral services at Leyden's Funeral Home, Calgary, on Friday, October 8 at 2 p.m. Interment followed in the family plot at Queens Park cemetery.

Funeral services were C.G. Yearwood, F.J. Bessant, L. Poxon, Dr. H. M. Elliott, R. Tricker and C.W. Allsop.

World's First Gas Turbine Car Engine

Greatest interest in the British Industries Fair in London and Birmingham is centered around the world's first gas turbine car engine—a new British invention which is expected to revolutionize the world's motor car industry. The engine is the smallest gas turbine ever made and can be installed in a standard car frame. It has 160 brake horse-

power and has a performance equivalent to that of a gasoline-driven car of 35-40 horsepower. Unlike the gasoline engine, it has no pistons, no cylinders, no row of spark plugs, no radiator and no clutch. It runs on diesel oil and uses a negligible quantity of lubricant. It will run on anything which will produce a continuous flame—petrol, paraffin or even oil candles.

MRS CARL LAMMLE BEREAVED IN LOSS OF FATHER

Henry Rider Teghtmeier, 73, of 825 15th St. N.W., Calgary, died Thursday, October 7 at his home. He was born in Middletown, Pa., and had moved to the Simon's Valley farm, 42 years ago to his wife. He retired to Calgary in 1942.

Surviving are his wife, Annie Elaine; three sons, Carl of Aldridge, Roy of Cochrane and Leo of Battle Creek; three daughters, Mrs. H. C. Ward of Calgary, Mrs. W.B. Hardy of Aldridge and Mrs. Pearl Lammler of Swallow; 50 grandchildren.

Rev. J. Rex Brown officiated at funeral services at Park Memorial Chapel on Saturday, October 9, at 2 p.m. Burial followed in the Union cemetery.

R.M.S. VANGUARD TO CARRY ROYAL FAMILY ON TOUR

Before taking the King and Queen and Princess Margaret to Australia and New Zealand early next year, R.M.S. Vanguard is to sail from Devonport for trials and a working-up cruise in the Mediterranean. The Vanguard is the ninth ship of her name in the Royal Navy. The Honor List aboard the present ship records successes from 1586 to 1946. These include the victories of Armand, Cadix, Barfleur, Quebec, the Nile and Jutland. She is the most powerful ship in the Royal Navy today with a main armament of eight 15-inch guns. She is over four times the length of Nelson's Column and has a standard displacement of 42,000 tons. The Royal voyage to South Africa last year was undertaken in the Vanguard.

BRITAIN REMAINS GOOD CANADIAN CUSTOMER

That Canada is still the principal supplier of foodstuffs to the United Kingdom is shown in an article appearing in Foreign Trade by W.B. Gornall, Agricultural Specialist of the Department of Agriculture and Commerce in London, England.

Imports of foodstuffs from Canada totalling 43,600,000 cwt. in the first six months of 1948 represent 37.9 per cent of all provisions purchased from abroad by the United Kingdom. This amount compares with 62.2 per cent in 1947 and 25.4 per cent in 1938.

These figures represented 82 per cent of the wheat and flour imported, 78 per cent of the cheese, 75 per cent of the bacon, 40 per cent of the eggs and 68 per cent of the canned salmon.

INCREASES REPORTED IN TRUMPETER SWANS

WASHINGTON—A probable victory in the trumpeter swan's fight against extinction was reported recently by the United States Fish and Wildlife Service.

Albert Day, service director, said 418 of the majestic, white-plumaged swans were counted from the air in Western United States reserves this summer. The number has increased slowly from a low of 73 in the United States in 1935, Day said.

Western Canada's trumpeters also are increasing and now number about 900, Day reported. A number of the birds, presumably from British Columbia and Alberta, were seen in Southeastern Alaska last spring.

Post Office Warns Of 'Phony' Bills

The Post Office Department is warning Canadians to examine any \$10 or \$20 American bills they may have.

There is a chance they might be counterfeit, part of a stream of bad bills filtering across the border.

The Post Office says the \$10 bill has the check letter "A" and is printed on cheap, soft paper. The \$20 bill has the check letter "B" and is noticeably thick to the touch.

EDMONTON REFINERY LINKED TO PIPELINE

Imperial Oil Ltd. officials at Edmonton announced last week that oil was now flowing through a 30-mile pipeline at the company's Edmonton refinery from the Woodhead-Leduc section of the Edmonton oilfield.

The final section of pipe, welded into position last Wednesday, was started July 20. With Sexton, local manager of the company, estimated the line cost \$500,000 to lay.

Alta. Farmers' Organizations Agree on Amalgamation

Lorne Stott, writing in a recent issue of The Family Herald and Weekly Star, says the final stages of several years of work have been reached in the long effort to amalgamate the Alberta farmers' organizations. Negotiation committee members of the United Farmers of Alberta and the Alberta Farmer's Union have reached an agreement of a proposed constitution for the new farm group, and branches of both organizations have been provided with a copy of the agreement for their study preliminary to the joint convention to be held in Calgary starting January 11th.

The terms provided for direct membership in the new Association, to be named at the first convention, by any or all of the members of the U.F.A. and the A.F.U. whose membership was in good standing during the year prior to amalgamation, provided they are bona-fide, or real farmers or ranchers. Membership at large is also provided to all farmers and ranchers on payment of necessary fees to the organization, but members-at-large will not have voting rights until becoming a member of a local. Women have the same membership rights as men under the proposed charter, which in addition provides for the setting up within the organization of both a Women's and Juniors' section, similar to those now existing in the U.F.A.

The Charter proposes an annual convention to be held each year between the dates of November first and December tenth at Calgary and Edmonton, alternately, and leaves the door open to other locations and times at the judgement of the Board.

The province will be divided into districts, with a Board member to be elected for each district. The President and Vice-President will be elected at the annual convention by the delegates, with the Executive to

consist in addition to these officials of the Presidents of the Women's and Juniors' sections and three additional members named by the Board and the Board of Directors from their numbers.

Locals of the new farm organization may be established by any six farmers, women or Juniors, provided a senior member have the assistance and supervision of an adult member.

The proposed constitution specifically states that the organization shall be non-partisan in politics but may exert pressure on all political parties to secure its objectives, which are:

- (a) to advance on all possible occasions the interests of farmers and farmers' co-operative organizations,
- (b) to coordinate efforts of various branches of agriculture and promoting their common interest through collective action,
- (c) to promote and secure necessary and just legislation,
- (d) to achieve a relationship of price to ensure agriculture a fair share of national production,
- (e) to contribute to a high standard of living for all citizens by increasing the highest production over a long period commensurate with sound agricultural practice,
- (f) to promote social intercourse, a high standard of community life and study of economic and social questions relating to agriculture and citizenship.

Preliminary to the joint convention in January, the United Farmers of Alberta will hold what may be the organization's final convention in Calgary in November, when members will be informed of action taken by the U.F.A. to segregate its co-operative business, clearing the way for amalgamation and plans which have been made for the two farm organizations to effect their amalgamation.

Latest Styles Displayed at I. O. D. E. Fashion Show

The Duke of York Chapter I.O.D.E. Fashion Show, held in the Scout Hall on Wednesday, October 6, proved to be a very successful event. The girls worked very hard and were pleased to see such a good crowd.

The program opened with the singing of O Canada and was followed by the Introduction by Mrs. M. Switzer, Karen Mortimer sang "Christopher Robin" just before Lynda Mortimer, Guss Nash and Glenvidya Fox came out for a stunner parade. Bobby Ollivier sang "The Toy Maker's Dream," followed by the modelling of blouses, skirts, sweaters, slacks, coats and snow suits for children from three to six by Barbara Nash, Karen Mortimer, Norma and Dorothy Hall, Lorraine Holmes, Betty Fox and Linda Mortimer.

Teen-Ager wearing apparel was modelled by Cynthia Barnes, Mary Flaws, Phyllis Schuler, Edith King, Eileen Schmidt, Lorraine Milligan, Norma Cooper and Estella Schell. The Stigmata girls gave a duet, "When You Were Sweet Sixteen," and a showing of house frocks followed. These were modelled by Mrs. J. Adams, Mrs. Teplaner, Mrs. D. Martin, Mrs. B. Fox, Mrs. Heath and Mrs. R. Shaw.

Before the modelling of afternoon dresses Don Gordon sang a solo, "The Sunshine of Your Smile." Modelling the afternoon dresses were Mrs. R. Mortimer, Mrs. B. Fox, Mrs. J. Adams, Mrs. Teplaner, Mrs. D. Martin, Mrs. R. Shaw, Mrs. A. Bramley and Miss Ruth King.

Mrs. J. Brown gave a pleasing rendition of "Glamina Mia." Suits were then modelled by Mrs. Heath.

Mrs. J. Adams, Mrs. D. Martin and Mrs. A. Bramley. The singing of "Alice Blue Gown," by Mrs. B. Fox.

Costs in the new fall shades of burgundy, green and grey were tastefully modelled by Mrs. R. Mortimer, Mrs. Teplaner, Mrs. B. Fox, Mrs. Heath, Miss Ruth King, Mrs. J. Adams, Mrs. D. Martin, Mrs. R. Shaw and Mrs. A. Bramley.

Before the display of evening gowns Mrs. Shaw very appropriately sang "Beautiful Lady." These were modelled by Marie Bell in pink nylon net, Edith King in mauve, Lorraine Milligan in yellow eylet, Mrs. J. Brown in blue nylon and marquisette and Eileen Schmidt in pink tulle.

The girls thanked everyone who assisted in making the fashion show a success and closed with the singing of God Save the King.

The I.O.D.E. extends its thanks and appreciation for the clothing contributed by The Style Shop and The Carlson Trading Company. Also to Mrs. S.F. Torrance who so ably rendered the music for the fashion show.

FRED BESSANT HOLDS PERFECT CRIB HAND

Fred Bessant now ranks with the elite of the crib players as a result of holding a perfect hand in crib. Playing with Mrs. L. Poxon, Fred was dealt three fives and the Jack of Hearts. On the cut the five of Mrs. Poxon's hand was the five of hearts. Fred counted a 29. Mrs. Bessant says he has been playing crib for 40 years and this is the first perfect hand he has ever held.

DRUG SERIES—STORY No. 5

Greek Medicine

The first records of a national or scientific medical system are Greek, and this dates back to about 500 B.C. The Greek studies in medicine progressed until the rise of the Roman Empire and the mode of their practice were brought about by the mode of factors.

From the conquered Minnows they learned the importance of sanitation. It is interesting to note that the sign of the serpent which is the hallmark of medicine was also the Minnow sign of a deity. From Mesopotamia the Greeks learned a standardization of medical procedure. The Mesopotamians had for years been accumulating a treasury of observation on anatomy (derived from the entrails of animals), to fertilize the future. From Egypt came the drugs of the Greek physicians. The basis of the Greek medical ethics can be traced to Egypt and many of the free surgical instruments were Egyptian in origin. The Greeks also learned from the Persians and Indians, but the amount and character of that knowledge we are not yet able to ascertain.

Penicillin Big Aid In Curing Common Cold

CHICAGO. — Penicillin rust, inhaled directly into the nose, throat and lungs has cured symptoms of the common cold in one to three days, three physicians reported.

Their study, published in the Journal of the American Medical Association, showed:

That a group of 169 common-cold patients treated, 42 per cent. were considered cured and 58 per cent. showed marked improvement.

"These phenomena cannot be fully explained on the basis of the known properties of penicillin and need further investigation," the doctors said, adding:

"In many instances the penicillin dust seemed to exert a vasoconstrictor (shrinking) action of the mucous membrane of the nose and throat.

Breathe More Freely

"Patients stated that they could breathe more freely through the nose and the stuffiness and congestion of the acute rhinitis (inflammation of the mucous membrane of the nose) often improved immediately after treatment.

"Also, on occasion, the pain of an acutely sore throat was ameliorated in one-half hour or less after treatment."

Pending further study, the researchers are assuming that the penicillin dust attacks not the virus that causes the cold, but the bacteria that prolong it.

Penicillin has proved a potent weapon against some bacteria, but has not proved itself effective, to date, against the tiny virus that causes the human cold.

However, penicillin dust inhalations multiply by many times the concentration of the drug that can be brought directly to the site of respiratory infections. One purpose of further studies will be to determine whether heavy doses of penicillin actually affect the virus itself.

In the inhalation treatment, patients merely breathe in the dust through a mask one to three times daily. Three to six minutes are required for each dose and patients can go about their business without loss of time and with minimum expense.

The study of penicillin treatments of various respiratory tract infections was conducted by Dr. Louis Krasno of the Department of Clinical Science of the University of Illinois Medical School; Dr. Paul S. Rhoads and Dr. Mary Karp of the Northwestern University Medical School.

Dr. Krasno said in an interview that he would recommend the treatment for "selected patients" whose common colds had a tendency to hang on and develop into pneumonia, sinus trouble or ear infections.

PREDICTS FURTHER POWER SHORTAGES—Further power shortages for Ontario are predicted by the Ontario Power Co., where the Gatineau river is far below normal. Giant shale gates, where water crashes and flows, regulate provincial water supply. Rock formations should be under water if level was normal and only pools remain after critical drop in flow that leaves rocks bare. —S.N.S. photo.

Income Tax Forms To Be Altered

OTTAWA.—A new streamlined income tax form—easy to look at and simple to handle—will be introduced to the Canadian public in 1949.

This was learned recently from a Government authority who also disclosed that the current simplified form, a postcard-like document called T-174, is headed for the scrapheap, because of complaints and abuse by people who were not entitled to use it.

The new income tax document, still in its embryo stages, will be a crisp, two-page affair, to be used by the majority of wage earners in Canada, including fishermen and farmers.

Thus, the current special forms for Western farmers and farmers generally also will go into discard. All those earning less than \$3,000 a year may get the chance to use the short form.

Although little is known yet of what the new form will contain, it is disclosed that much of the heavy legal language, which marked income tax documents in the past, will not appear.

Likewise, long spells about threats of prosecutions for infractions of income tax law will not appear on the short form. It will measure four inches in width and six inches in height.

These two statements—T-1 short form and T-1 general—will be the main forms in use in 1949, covering income earned in 1948.

Despite a springtime thunderstorm that knocked out a 20-foot section, the animals now have a six-foot dam flooding about 15 acres.

The power company still is clearing trees in preparation for construction.

The mouse is the largest member of the deer family.

Inspection Checks Quality Of Feeds

It may not be sufficiently realized by farmers that the Dominion Government provides protection for the Canadian livestock and poultry feeder through the Feeding Stuffs Act and Regulations. This Act is administered by the Plant Products Division of the Dominion Department of Agriculture and in brief is designed to set minimum standards of quality and chemical composition for all common feed stuffs offered for sale in Canada.

The manufacture and sale of the various feeds has developed into an industry of considerable size and importance. For example, during 1948 the manufacture of mixed feeds alone totalled 1,585,752 tons with a selling value at the plant of \$80,286,107. This does not include chopped grain, mill feeds, protein feeds and all other feed ingredients which combine within the scope of the Act and which would bring the total to upwards of 5,000,000 tons.

This volume obviously presents sampling and testing difficulties, but all feeds are sampled and tested periodically. Last year some 4,469 samples were taken across Canada and tested chemically for protein, fat, fibre and mineral content and tested microscopically for physical composition.

Many feed manufacturers conduct their own tests and most do their utmost to produce high quality feeds but all will agree that the government supervision, through testing and the Feeding Stuffs Act, has tended to have a better type of feed on the market than in the past.

WHEAT OUTLOOK GOOD

OTTAWA. — Prospects for the world wheat crop are rosy this year than they have been for a long time, the Dominion bureau of statistics reported here. The bureau said the 1948 world wheat crop may be 17 per cent. above the 1947 level totalling in all some 2,250,000,000 bushels.

Fire prevention officials urge repeatedly that proper ash receptacles be provided in homes and business places wherever people smoke.

Stoves, furnaces boilers and appliances continue in second place as the next most common cause of fire, the number being 5,086 and the monetary loss over \$3.1 millions. These fires are usually more dangerous than smokers' fires, because they are often not so readily detected in the early stages and the fire gets a good head before any effort can be made to extinguish it.

The third most common cause is electrical wiring and appliances, to total 4,083 and the value \$4,624,137.

FRIENDSHIP

Oh the comfort, the inexpressible comfort of feeling safe with a person—when they have seen you, weighed you, weighed your thoughts, weighed your words, when they have seen you, weighed you, weighed your thoughts, weighed your words, when they have seen you, weighed you, weighed your thoughts, weighed your words.

FOUR TO ONE

MANCHESTER, England.—When Martha Kelly, 19, kicked and struggled "like a woman gone mad," four policemen took off her shoes and carried her out of a cafeteria.

Smokers Blamed For One-Third Of CANADA'S FIRES

Smokers continue to be held responsible for about a third of all the fires occurring in Canada, according to the statistics of the Dominion Fire Commission. Of these "smokers' fires" was about 9 per cent. of the total.

Official estimates place the total of smokers' fires at 16,232 out of a total of 52,931, the monetary value of property destroyed in these figures being \$5.3 millions, out of a total of \$7.7 millions.

As usual most of these fires were caused by carelessness, such as leaving a cigarette burning in a ashtray, or carelessness, leaving a cigarette burning in a ashtray, or carelessness, leaving a cigarette burning in a ashtray.

Fire prevention officials urge repeatedly that proper ash receptacles be provided in homes and business places wherever people smoke.

Stoves, furnaces boilers and appliances continue in second place as the next most common cause of fire, the number being 5,086 and the monetary loss over \$3.1 millions. These fires are usually more dangerous than smokers' fires, because they are often not so readily detected in the early stages and the fire gets a good head before any effort can be made to extinguish it.

The third most common cause is electrical wiring and appliances, to total 4,083 and the value \$4,624,137.

Helpful Hints

Now that the cool weather is coming on, don't forget to have your hands look new much smarter if teamed with a good pair of gloves.

Chopped greens combined with peaches and brown sugar make a delicious filling for baked pears or apples. Serve with whipped evaporated milk or cream.

Leftover chicken makes Waldorf salad into a main dish for lunch. Just add the cubed chicken to the celery, apples, walnuts and mayonnaise and serve in lettuce cups or on short sprays of watercress.

To clean the inside of a vase which is oddly shaped, cut up small pieces of raw cotton, tie one end and then fill with vinegar. Let stand for at least 12 hours, then shake well and wash in soap and water before using.

Smile of the Week—

SAY SOMETHING

"I've been asked for references for my last man. What on earth can I say in his favor?"

Farmer Has Queerest Hobby In Canada

WHITBY, Ont. — Five varieties of monkeys, the only mated pair of sulphur-crowned cockatoos in Canada, a Blue Merle dog and sundry other exotic inhabitants of Donald McDonald's suburban Whitby recently to a ranch near Whitby recently to a "law home and more spacious quarters at Maple Grove, Ont., two miles west of Bowmanville. New name of the ranch is "Jungle Land."

The strangest hobby in Canada, begun two years ago by the son of a Presbyterian missionary who was brought up in India, is today expanding into a business attracting nationwide attention.

Recently a sulphur-breasted toucan from South America was imported and sold for \$800. More toucans are on the way. There are magpies, hawks, Mexican red cardinals, scarlet finches and doves on Mr. McDonald's ranch, but the monkeys attract the most attention from passers-by on Highway No. 2. Ringtail monkeys, marmosets, spider and squirrel monkeys are kept in stock.

Practically all the animals reach here from South America by plane to Milton airport, New Toronto. They spend time in quarantine in the city and are then taken to the health before entering Canada.

The cockatoos recently learn to talk the three McDonald children, Ronny, Betty and Jimmy, teach them to say short sentences clearly. Visitors are cordially greeted with "Get outta here," "Hello," "Want a cigarette?" and other startling phrases by the birds which look more like stuffed ornaments than living creatures.

The mated cockatoos are valued at close to \$1,000. They are the only pair in Canada since importation was barred about 10 years ago. The feathers of the cockatoos are more lustrous than her male, Tarzan.

While in India, Mr. McDonald learned the ways of the animals and birds, and how to care for, feed them and train them. Many varieties of monkey sell for less than \$100 each—fully housebroken and taught a few tricks. Donors have been taken to homes of prominent Toronto and Montreal families. They are easy to feed—they'll eat prepared baby food, potatoes, bread, rice and vegetables.

Most of the animals first arrive they are inclined to be nervous and perhaps shy. But a few days of patient training makes them as desirable a house pet as any cat or dog.

Smokers Blamed For One-Third Of CANADA'S FIRES

Smokers continue to be held responsible for about a third of all the fires occurring in Canada, according to the statistics of the Dominion Fire Commission. Of these "smokers' fires" was about 9 per cent. of the total.

Official estimates place the total of smokers' fires at 16,232 out of a total of 52,931, the monetary value of property destroyed in these figures being \$5.3 millions, out of a total of \$7.7 millions.

RIGHTED OF \$300 — Four or five months ago, police think belong to a Toronto juvenile gang kidnapped Yip (a Chinese fruit firm proprietor, who guanoed and robbed him of \$300. They drove him to Thistleford, Ont., where they let him out and told him if he didn't want to die he had better walk through a field as far as he could. (a) complied and then returned to the highway, where he notified the police.—S.N.S. photo.

Herders For Reindeer Have To Be Experts

OTTAWA.—Canada's 6,500 reindeer are thriving in their sub-Arctic home at the mouth of the Mackenzie river. But there's a shortage of qualified young herders.

Government officials said recently that United States authorities have been asked to keep an eye in the displaced persons camps of western Germany for men who could fit the bill.

The Mackenzie delta was set aside as a reindeer reserve in 1925, when a herd of 25,000 reindeer was brought from Alaska was settled there. Since then, the herd has grown to about 6,500.

Several Lapp herders were brought from Norway in the early days of the project to help teach herding to the Eskimos. But there now are few Lapps and well-trained herders are needed.

"The men were looking for don't have a chance to get a job in the Plenty of Norwegians, Swedes and Finns know reindeer-herding well. We need no more than half a dozen at the outside and they must be young and able to live under Arctic conditions."

"The resources department asked me to look for men with a good knowledge of reindeer herding, for qualified men among immigrants. They have given one step farther than to look for men with a good knowledge of reindeer herding, for qualified men among immigrants."

The official said there's more to herding reindeer than folks might think.

"They are peculiar animals, with their own little ways, and a herdsman has to be an expert to bring them along properly."

"They are like a horse, horns or fence and it's not too hard to tame them, but they require constant care."

Helpful Hints

Now that the cool weather is coming on, don't forget to have your hands look new much smarter if teamed with a good pair of gloves.

Chopped greens combined with peaches and brown sugar make a delicious filling for baked pears or apples. Serve with whipped evaporated milk or cream.

Leftover chicken makes Waldorf salad into a main dish for lunch. Just add the cubed chicken to the celery, apples, walnuts and mayonnaise and serve in lettuce cups or on short sprays of watercress.

Smartest decorations today are peacocks gay! Pattern 7032; transfer of peacock, crochets a doorway. Our improved pattern—visual with easy-to-use charts, a photo, and complete directions—makes needle work easy.

To obtain this pattern send twenty-five cents in coins (stamps cannot be accepted) to Household Arts Department, Winniepeg Newspaper Union, 115 McDermott Avenue, Winnipeg, Man. Be sure to write plainly your Name, Address and Pattern Number.

STORY OF LEMON

About 50 years ago, the fourth of the lemon used in the United States came from Italy and Sicily. Today, most are grown in the United States.

TRACTOR DEATHS

The epidemic of farm tractor fatalities in Manitoba this Summer has served to call attention to the fact that the tractor is an extremely dangerous piece of machinery unless normal care is exercised.

The companies that make them recognize this and give buyers explicit safety instructions, with particular reference to the danger of over-balancing. One of the complexities, at least, has gone to the trouble to make a movie short showing the prospective driver just what hazards he should avoid. The picture has been shown in many rural centres in Manitoba.

But, despite all the safety instructions, men have lost their lives and others have been severely injured in the grim succession of accidents this Summer.

All tractor operators should read up a safety code based on the known hazards of operation and they should follow it to the letter. They will live longer.—Winnipeg Citizen.

TIME SAVED NOT WORTH THE RISK

With the co-operation of the local police, a well-known racing car driver made two trips down a 15-block course in the heart of the city of Colorado Springs. The first time he carefully obeyed all the rules, and completed the course in 9 minutes and 35.1 seconds.

The second time he broke every law in the book. He drove at an illegal speed, cut corners, went through stop-lights, gave no signals, passed other cars on the wrong side, and even drove through a safety zone.

As a result, he was fined \$100. In fact, it was found that he had made the run in 9 minutes and 31.2 seconds. He had saved exactly 3.9 seconds. —2788

NAMED NEW MODERATOR—Now moderator of the United Church of Canada, H. J. Fox, William E. Browning of St. George's Church, Toronto, is shown here with Mrs. Browning. He was unanimously chosen over other candidates at Vancouver, B.C., Montreal.—S.N.S. photo.

WORLD HAPPENINGS

BRIEFLY TOLD

From Jan. 1 to June 30 this year 244 persons were killed in Ontario traffic accidents and 5,941 were injured.

George Woolhead of Linstead, Buckinghamshire, England, boasts he grew a carrot 3 feet 7 1/2 inches long with the top cut off.

The Supreme Court of Israel, the first all-Jewish high court to sit in Jerusalem in 2,000 years, held its inaugural session recently.

Defence Minister John Diefenbaker rejected opposition proposals for introduction of compulsory universal military service in Australia.

Land devoted to food production in Britain has increased by nearly 500,000 acres since last year, Agriculture Minister Williams said.

After years of failure, the National Association of Outfitters has enlisted enough male mountaineers to stage a fashion parade in men's wear.

REGINA.—The federally-operated Prairie Farm Assistance Act will pay 60,000 farmers in the three prairie provinces \$14,000,000 for the crop season 1948-49.

And, Britain's new cloth made from pounds, will be produced at the rate of 10,000 tons yearly, it was announced recently.

Material has all the qualities of wool, is moth-proof and crease-proof.

Bonnie Mussolini's widow and her two youngest children, Romano, 20, and Annamaria, 19, are in such straitened circumstances they must come to the United States to look for work, the New York Star said.

GEMS OF THOUGHT

RESPONSIBILITY

Every human being has a work to carry on within, outside to perform abroad, influences to exert, which are peculiarly his, and which no conscience but his own can teach—Channing.

Much misconception and bitterness are spared to him who thinks naturally upon what he owes to others rather than what he ought to expect from them—Madame Guizot.

The vast majority of persons of our race have a natural tendency to shrink from the responsibility of standing and acting alone—Francis Galton.

Sin with the multitude, and your responsibility and guilt are as great and as truly personal as if you alone had done the wrong—Tyrone Guthrie.

The most important thing I ever had was that of my individual responsibility to God—Daniel Webster.

If living in disobedience to Him, we ought to feel no security, although God is good—Mary Baker Eddy.

EPIDEMIC DISEASE

Fluorin, a rat-borne disease, can be traced through history as far back as 1320 B.C., according to the historian, Yu Lien-tch. It was first known in Palestine, in lower Egypt. The epidemic disease mentioned in the Bible is now believed to have been plague.

THE OLD HOME TOWN

By STANLEY

Big Oil Future For Pincher Creek

An article by Gordon Grant in the Sept. 4 Financial Post claims Canada as one of the world's last oil frontiers. Western Canada appears to be the main source of present potential output.

The article calls attention to the Pincher Creek field saying it may emerge as a great field possibly rivaling Leduc and Turner Valley. At Pincher Creek the initial Gulf Oil Discovery well might prove good for 20,000 barrels a day. An official of Gulf Oil has stated that Canada needs a pipeline to the west coast if she is to cash in on oil possibilities.

A leading P.S. authority is quoted as saying that within a decade Canada will be one of the world's major exporters of oil. Its oil career is just starting. Every American oil company of any size is now participating in the search for oil in western Canada.

The prairie and sub-arctic belt of favorable sedimentary rock is over 500,000 square miles. That area today is yielding over 37,000 barrels a day, about 14 per cent of national requirements.

Prairie output is still unable to fill prairie demand but that output has doubled in the last year, and drilling of wells on proved acreage is proceeding faster than ever before.

The Leduc field turning out 20,000 barrels daily now has doubled the daily output of Turner Valley, yet is scarcely 1½ years old. Lloydminster is turning out 5,000 barrels daily and is just getting started.

Turner Valley has taken on a new lease with successful House Oil drilling which has outlined a large new productive sector.

Prospects for further discoveries in the Edmonton-Leduc area forecasts 70,000 barrels per day in the next few years which would in itself be more than enough for prairie needs.

Proven area at Leduc is estimated at 20,000 acres, and with one well for 40 acres (which is less than permitted), a total of 500 producing wells can be expected.

Great optimism prevails in respect to the Lloydminster field. Separate discoveries have been made over an area 45 miles long and 37 miles wide. If only 10 per cent of this area is productive it might mean a total of 500 million barrels. But local producers say that present freight rates keep Lloydminster crude from moving as far as Regina. Given a favorable freight rate Lloydminster crude could sell from Vancouver to Fort Arthur.

Leduc situation is different. Its crude is high grade and a pipeline is being planned from Leduc to Regina and perhaps south to the U.S.

In the Turner Valley area there are 50 further well sites as a possibility. But the oil industry comes face to face with the crucial problem of freight. Is Canadian oil going to be like Canadian coal, immense in supply but in the wrong place geographically.

\$25 NO GOOD "OUTSIDE"

INDIANAPOLIS—Walter C. Seward is back in jail because the cost of living is too high outside.

Seward, who has spent 33 of his 54 years inside the state prison at Michigan City, asked parole officials to send him back to prison, where he had been serving life for a slaying.

He had been freed on parole last week and was working at a tree nursery job parole officials had obtained for him.
"I couldn't keep from violating my parole on just \$25 a week," Seward said.

ALBERTA LEADS IN HONEY PRODUCTION

Fifteen years ago Alberta beekeepers were few and far between. For the most part, farmers considered bees somewhat as a hobby, especially in the northern and central parts of the province. This year, however, delegates to the annual convention of the Edmonton and district Beekeepers' Association learned that honey production in Alberta topped all of Canada this year. Some producers obtained yields of 300 pounds per colony. Average for the province was 113 pounds, while the Dominion average was set at 74½ pounds per colony.

SCOTT'S SCRAP BOOK

By R. J. SCOTT

The civil war in China and floods on the Yellow, Yangtze and other rivers have made 55,000,000 persons homeless in that country.

CLASSIFIED ADS
GET RESULTS

SEMI-DOMESTIC COWS

Said Bob Edwards in the High River Times in 1941: "The new Walrod ranch company is advertising 10,000 cattle for sale in the Winnipeg Free Press, 'owing to curtailment of range by settlement,' and so forth. The ad makes rich reading for a western rancher. It says that these cattle are semi-domestic and yield a very large quantity of rich milk. This statement is almost as wild as the cover themselves, though not quite. Not all the ranch men could handle one of these semi-domestic cows by itself without the lurch. The only way to come even near milking one of them is for a couple of cowpunchers to chase the dear creature on horse back for several miles, rope her, throw her, hogtie her, drive four stakes into the ground, attach a leg to each stake, drive a post into the ground and tie her head to it very tight—then send up smoke signals for somebody to fetch a pail."

PLOWGIRL WINS

HULL, Joe—Faye Radmore, a 16-year-old Hull girl, took the championship of the South Hull Plowmen's Association, lifting the best men's score by four points.

Crown Disposes Of Nearly All War Plants

Virtually all the industrial buildings constructed or financed directly by the Crown during the war have now been disposed of permanently or temporarily. Of their 33.5 million square feet of floor space, 84 per cent has been more or less permanently disposed of through sale to industry, transfer to government departments or to Crown corporations, or has been dismantled or demolished. An additional 15 per cent has been leased to industry, in part of a multiple tenancy basis, or temporarily transferred to the War Assets Corporation for war surplus storage purposes. The balance of only one per cent is now available for disposal. The Canadian government financed the construction of 170 new plants during the war at a cost of over \$200 million, excluding an expenditure of \$500 million on equipment.

The plants turned over to private industry and business adapted to peacetime production are expected to employ more than 50,000 people. They will be turning out almost

RECORD HARVEST REAPED IN SOUTH AFRICA

South Africa's 1947-48 harvest is the greatest ever reaped in the Union, according to official estimates of the South African Department of Economics and Marketing. Production of maize, tobacco, groundnuts, sunflower seed, kaffir corn, beans and cheese is, in each case, a record. The total number of beef cattle has been the highest for years, and while mutton is only beginning to build up following the 1944-47 drought, it is expected that pork will be marketed in increasing quantities to fill the mutton shortage.

every major type of manufactured product, including automobiles, airplanes, communications and electrical equipment, paper and wood products, chemicals, pharmaceuticals, plumbing and heating equipment, and textiles. Many of these commodities are being produced in Canada for the first time, and are thus contributing to the diversification of Canadian industry and the maintenance of a high level of employment.

"Remember The Sabbath And Keep It Holy"

"Why is it that some years ago, when we all had less leisure time, the Sabbath was more highly respected than it is today? Maybe you will not agree that we have lost any of our regard for the Lord's Day.

On my way to Sunday School today I made a number of observations. First, I saw three boats in our river with fishermen apparently enjoying the Sabbath by fishing. Second on the road, I saw a trucker who had pulled aside with loads of peaches, cantaloupes, etc., which they were selling. I saw a man painting his house and a woman working in her garden; another man was polishing his car. Had my path led far enough it would have been easy to see golfers on the course, baseball games on the diamond, and family nicker at the resorts!

As a lad I do not recall ever having seen any such things. You know all the arguments by folks who do everything but go to church on Sunday—they are busy all week and need recreation and the only time they have is on Sunday. I never did call for an argument.

The only thing I know is that God said, "Remember the Sabbath day and keep it holy." He further enumerated certain things we should not do on the Sabbath and in so saying laid down a pattern for us to follow. I am convinced that if we break the law we must pay the penalty. I may ignore the law of gravity and jump out of a ten-story window but if I do I will break my neck. Just so when we break God's laws, we will suffer the consequences.

So I ask myself this question, how is the breakdown of our Sabbath today affecting us? I could not lay my hands on the answer. What is the penalty for breaking this law? Perhaps the most evident is our moral decay. We are robbing God, too! It is His Sabbath we are failing to keep! Yes, it is a Sabbath given to us. It's His time we are using for our own pleasure. If you want to know what blessing we may enjoy by keeping the Sabbath holy, then read Isaiah 58:13-14.

Frankly, this problem is too great for me to analyse but I raise it because I am alarmed at what it may cost us. What do you think?"

WHEAT CROP ESTIMATED

TO TOP THAT OF 1947

The 1948 wheat crop for all Canada is estimated at 372,000,000 bushels, the bureau of statistics has announced.

This is 31,000,000 bushels greater than last year's crop and about 35,000,000 bushels below the 1938-47 average.

The bureau's first estimate of the prairie provinces' spring wheat crop is 340,000,000 bushels, compared with 319,000,000 bushels last year.

Estimated 1948; production of other grains:

Oats—338,000,000 bushels, a gain of about 50,000,000 over last year.

Barley—146,000,000 bushels, a jump of 5,000,000.

Rye—26,300,000 bushels, an increase of almost 100 per cent.

Flaxseed—A "near record" of 18,000,000 bushels, compared with 12,000,000 bushels last year.

HERE'S WHERE WE STAND
ON NEW-CAR SELLING

General Motors Dealers' "Foursquare Selling Policy" assures you
a Fair Deal when you buy a new car

Let's bring this subject right out in the open. Many conditions still exist which encourage the "gray marketing" of automobiles. You don't like this—and neither do we.

There's no law against "under the counter" deals—demanding a bonus for early delivery.

There's no law against loading cars with accessories the customer doesn't want or need.

There's no law against selling to buyers who make it their business to resell new cars at inflated prices.

1 NO PADDING OF PRICES

We guarantee our delivered prices to conform with the manufacturer's recommendation and to contain nothing but standard charges which, of course, include Sales and Excise Taxes. You receive an itemized bill of sale. All prices are an "Open Book"—they are available to you and we tell at these listed figures.

2 NO LOADING OF UNWANTED ACCESSORIES

All cars are offered with factory-installed accessories only and prices are figured to cover these. We pledge ourselves to add no "extras" except those each customer orders—and to avoid using "extras" to increase the delivered price.

We wish to express our sincere appreciation to our loyal customers and friends for their patience in awaiting their turn for delivery of new General Motors cars.

Although the popularity of General Motors cars is unprecedented, and the supply is lagging far behind the demand, we are doing our utmost to be fair and equitable in their distribution.

But We Don't Do It Because It's Not Good Business

All dealers buy cars at clearly established factory prices which with the exception of transportation, are the same, model for model, all over the country. All start on a fair and equal basis—and should therefore sell at these fair and reasonable delivered prices.

So we're making public announcement of our code of fair dealing.

Our foursquare selling policy, simply stated, is this:

3 TRADE-INS DESIRED—BUT NOT COMPULSORY

We will take your order for future delivery, without requiring a trade-in. However, we have many valued used-car customers who do depend upon us to supply them with automobiles. For this reason we would like to have your trade-in, and we'll give you a fair and reasonable allowance for it.

4 NO COLLUSION

While we cannot prevent our customers from reselling new cars, we will not knowingly be a party to such transactions. Our only interest is to deliver new cars to bona fide customers.

We present this platform because we believe it's good business to keep our customers informed.

It's a platform that gives you a fair deal when you buy a new car—exactly the same kind of a deal and treatment you got before the war.

If you wish additional information, it will gladly be supplied by any dealer whose name is signed to this announcement.

G.M.A.

LOCAL DELIVERED PRICES

of Canadian produced General Motors Cars including Standard Factory Equipment, five new type low-pressure tires and Dominion Sales and Excise Taxes, but not including License Fee or Provincial and Municipal Taxes where these apply.

KICKING OFF—Getting off a lucky kick to open the football game in Winnipeg recently between the Blue Bombers and Regina Roughriders is Viscount Alexander who also won an argument. Photographers wanted him to kick the other way, into the sun, but against the wind. The viscount took the wind, and booted a fine 35-yard kick.—S.N.S. photo.

HEAVY TRANSPORT DEMOLISHES RECENTLY VACATED BEDROOM—Recently Gonda Benn, of Toronto, shown here with brother Billy, moved out of her front bedroom to a bedroom in the back of the house. Shortly after changing her sleeping quarters, a transport smashed into home and demolished bedroom. A heavily-loaded transport hit Benn home

and general store which is located on edge of highway. Front bedroom took force of impact as vehicle piled into structure. Wreckage shown was extensive as walls toppled. The driver was knocked out but soon recovered. Benn family said the crash felt as if an earthquake had hit their home.—S.N.S. photo.

CHILDISH WONDER—Rubber ball suspended in mid-air by air-flow from vacuum cleaner is object of childish wonder to Billy McCracken, Kingston, Ont.—S.N.S. photo.

RETURNS TO JAPAN IN DIFFERENT ROLE—Doo-bittle raider who spent 40 months in Jap prison camps, Jacob DeShazer is taking wife and son to Japan to become missionary.—S.N.S. photo.

DIP WINGS IN SALUTE, PILOT AND FRIEND DIE IN PLANE CRASH—"Dipping" his friends' homes at Timonburg, Ont., Beverly Harrington, of Woodstock, Ont., pilot, and Stephen Brady, of Ingersoll, were killed when their light plane, shown here, hit a tree and crashed into ditch. Friend came out of house to see the aircraft and Harrington "dipped wings" in a salute.—S.N.S. photo.

SIR STAFFORD CRIPPS—Photo taken of Sir Stafford Cripps, England's Chancellor of the Exchequer, during his visit to Canada. Sir Stafford reported Britain was experiencing a splendid recovery, but there would not be any let-up on the austerity living.—S.N.S. photo.

THE BIG SPREAD, PRODUCER TO CONSUMER—Egg grading plants pay farmers 26 cents a dozen for eggs, sell them to wholesalers for 40 cents. Retailers pay 45 or 46 cents, consumers like Mrs. Lynna Gardner, shown here, pay up to 64 cents. That makes the price spread from producer to consumer 26 cents at current Ontario prices.—S.N.S. photo.

LIE DETECTOR HAS NEW USE—The lie detector is becoming even more important as a crime deterrent than for its original purpose, a criminologist reports. George W. Hancy of Chicago, co-author of "Lying and Its Detection" and a personnel consultant to several industries, says thefts have dropped sharply among employees in companies where a polygraph is used. A large drug chain with 10,000 retail outlets that at one time lost an estimated \$5,000,000 a year through employee thefts of cash, has cut its loss to an almost insignificant figure, he said. Above a model illustrates how it performs.—S.N.S. photo.

VANCOUVER GIRL TAKES TO SEAFARING—Anna Oso, 28, of Vancouver, left, with one of two women among the crew of Norwegian ship Shalaba when she sails in few days. Anne was hired from among 200 Vancouver applicants for job as ship's stewardess. She wanted "life at sea". Already on board is Anna Oso, right, the vessel's radio officer. The two Anna's will cruise through the Orient on the ship's trip.—S.N.S. photo.

BOAT HAS GIANT OUTBOARD MOTOR UNIT—First Canadian-made boat using a giant-size outboard motor unit, is making its trial run off Lake Ontario at Oakville, Ont. Equipped with the same type of motor used on landing barges in the last war, the craft is designed to do towing work, an Oakville boat-building firm. The boat is equipped with a 16-horsepower diesel engine, has a speed of 12 knots and will run all day at the cost of around \$50.—S.N.S. photo.

OUR *First* CUSTOMERS

Every morning, before the bank is open for business, branches of the Bank of Montreal all over Canada are making deposits for the day's first customers.

Banking by mail is safe, speedy and convenient. For those who cannot get to the bank, and who do not want to run the risk of having loose cash around the house, it can't be beaten.

Next time you're passing a branch of the B of M, why not drop in and ask about this service? Or—if you won't be coming into town soon—write today for our folder, "How to Bank by Mail". With it, you can open your account right away—without even a visit.

BANK OF MONTREAL

Carbon Branch: D. E. RUSLER, Manager.

Canada's First Bank...WORKING WITH CANADIANS IN EVERY WALK OF LIFE SINCE 1857

a spur that
works for *You*

You choose the bank which suits you best.

Your freedom of choice keeps the spur of competition

always working to give you better and

better banking service.

Canadian banks, like other private concerns,

compete for your business. They strive to

excel one another in helpfulness and efficiency—in

satisfying your requests for information or

advice—in meeting the growing, changing financial

needs of the community.

Len Poxon, Dusty Poxon, Jim Flaws, and Ed Rouleau of Didsbury left Sunday on a goose hunting trip near the Saskatchewan border.

TRUCK DRIVER INHERITS WEALTHY UNCLE'S ESTATE

SCRANTON, Pa.—Walter Pearson, 32, a truck driver, learned recently that a Canadian uncle he met once as a youngster, has left him \$363,000, a 14-room mansion and a fishing lodge.

The news came as a surprise to the bespectacled Pearson because he did not know his uncle was wealthy. Pearson was named for the uncle, Walter Pearson, who went to Montreal 80 years ago and made a fortune in the brewery business.

"I guess I owe it to my father and mother for naming me Walter," said Pearson, father of five children.

He said he intends to keep right on working as a driver for a Scranton dry cleaning establishment despite his inheritance.

Pearson said that last June a representative of the law firm of MacKenzie and MacKenzie, Montreal, visited him and asked whether he had an uncle in Canada.

Pearson said he has been informed the bequest was left to him in trust for ten years, during which time he was directed to live in the mansion, located in Montreal.

In 1958 he will inherit the entire estate to do with it as he pleases. "I'm still a little undecided about living in Canada," Pearson said.

"There's a possibility that I can still live in Scranton while I'm getting the interest. At least I hope so. I like Scranton quite a bit."

APPLICATION FOR LEASE OF ROAD ALLOWANCE OR SURVEYED HIGHWAY

Esso
KEROSENE and
IMPERIAL NAPHTHA
For Lamps and Lanterns

The following letter from the Head Office of the Coleman Lamp and Stove Co. Limited speaks for itself:

"It has been our policy from time to time to have our laboratory test Esso Kerosene and Imperial Naphtha. After careful analysis each time we have found that Esso Kerosene and Imperial Naphtha have all the qualities so essential in fuels that are to be used in Coleman lamps, lanterns, irons, stoves, blow torches, and similar products. We highly recommend them for use in Coleman kerosene or gasoline appliances."

For complete satisfaction in your kerosene and gasoline appliances always use Esso Kerosene and Imperial Naphtha.
